

DRY GIN

Schiedam, The Netherlands

By The Dutch

<http://www.bythedutch.com/>

Method & Production

Main botanicals: juniper berries, nutmeg, cinnamon, cardamom, laurel (bay leaf), blood orange, coriander and lemon peel.

Crafted by Herman Jansen Distillery in Schiedam, the gin features juniper berries, nutmeg, cinnamon, cardamom, laurel (bay leaf), blood orange, coriander and lemon peel, all individually distilled using a Pot Still. The Gin also contains a very small proportion of malt-wine, a typical base for Dutch Genever. This unique addition reflects the Dutch origins that survived over 300 years of history.
