

GIN JUNIPERUS CASK FINISH

Piemonte, Italy
Bèrto

www.distilleriaquaglia.it

Method & Production

This unique Gin is a product of distillation in pot stills using botanicals such as Italian juniper berries, wormwood flowers, iris, rosemary and bay leaves. And finally it is aged in small barrels made from juniper wood.

Tasting Notes

A warm, amber color comes from the aging in wood. Slight smoky notes coming from the toasted interior of the wood, gentle floral notes too, the flavor of juniper wood is strong. The palate is warm and smooth with lingering finish.
